

Software to Improve Healthcare Efficiency

Desktop Fax

PRODUCT BRIEF

Reliable Windows Desktop Faxing

Healthcare professionals need access to information stored in their healthcare information system. These critical reports can be conveniently delivered via fax, a tried-and-true method. To simplify the set-up and use of faxing reports to doctors, nurses and other healthcare professionals, Interbit Data's NetSolutions network faxing products give you cost-effective options.

EXPANDS FAXING CAPABILITIES TO THE ENTIRE ENTERPRISE

Desktop Fax, an option for the NetFax and NetDelivery products, is used to integrate fax and e-mail functionality into different environments without the need for extensive modifications. It supports all important network protocols (e.g., LPD/LPR) for connection to the fax server, making sending a fax message as easy as printing a document. Data fields can be used to specify the parameters (recipient, subject, priority, etc.) from within an application.

PRODUCT INFORMATION

- Runs on Windows 2003 and 2008 operating systems
- Includes fax from any Windows application using a special printer driver
- Supports Inward Dial Routing using Direct Dial Numbers (DDI, MSN), Caller Identification (CSID) or Line Routing
- Supports optional print-out and/or e-mail of incoming fax messages and send reports
- Provides application controlled definition of fax parameters (subject, recipient, priority, etc.) using data fields
- Formats fax messages using printer sequences of HP LaserJet, Epson LQ and Postscript
- Supports sophisticated user and security concept
- Enables data exchange with external databases using ODBC
- Uses least cost routing and automatic optimization of transmission times
- Supports user-defined cover pages and overlays
- Supports automatic archiving
- Supports most common fax modems, ISDN adapters and fax boards
- Gains Internet access through direct or dial-up connection with RAS
- Supports HP Digital Sender 9100C
- Includes automatic hardware detection and configuration by the Set-up program
- Supports Citrix terminal servers

Features and Benefits

- Integrated with Windows printing routines to simplify the faxing process for users
- Choose to e-mail rather than fax a document through the same routine to reduce the demand for fax lines
- Support for inbound fax routing to route incoming faxes directly to a department or user
- Specify parameters for user access to allow departmental management of queues
- Shared and personal phone books to reduce redundant entry
- Automatic notification via e-mail and/or print-out to ensure that a fax was sent on time
- Automatic archiving to save faxes and logs for future reference

About Interbit Data, Inc.

Interbit Data helps healthcare organizations deliver more consistent patient care with secure, reliable and cost-effective software solutions that improve operational efficiency. Interbit Data products are used in more than 650 customers worldwide.
