NetDelivery Fax Only
### *Your Care Team Informed™*

Automated distribution of hospital reports

Hospitals require the ability to distribute patient information and reports to providers and partners. NetDelivery Fax Only intelligent report distribution enables hospitals to simply and reliably send information from your healthcare information systems to the recipient's fax machine. The Fax Only configuration is the most affordable way to take advantage of the communication efficiency that NetDelivery brings to hospitals.

NetDelivery

HCIS & Other Systems   Server   Fax

DOCUMENT DISTRIBUTION & MUCH MORE

NetDelivery Fax Only enables organizations to improve their fax delivery by automatically identifying recipients and utilizing their system-validated numbers to ensure accurate delivery. The system will track all fax activity and can notify users and/or administrators of successful or unsuccessful delivery. Authorized users can view the fax queue and resend faxes on demand.

> **Speeding, simplifying and securing data distribution**
> *"NetDelivery gives users the ability to push data through the Internet on-demand, and deliver it faster and more reliably. It's simple and straightforward to use, and because Interbit Data is familiar with MEDITECH, they offered instructions for setting up the software that made the implementation very easy."*
> **Kelly Wells, Assistant Director of IT**
> **DCH Regional Medical Center**
